Improving Low-Reading Ages in the Secondary School

Middle level teachers are unique not just by virtue of the level of students they teach but also by the ways in which they teach. This monograph emphasizes strategies that actively engage students of all ability levels, promote collaboration, provide for various levels of concrete and abstract thought, and foster student inquiry. The monograph presents approaches to assessing reading and writing, cooperative learning, vocabulary development, reading comprehension, and critical thinking and to other topics that are directly reflective of current research. It provides step-by-step procedures along with classroom examples in a convenient and serviceable format, and its research-based teaching strategies are applicable to all subject areas. The introduction offers an overview of the research on prevailing versus preferred instructional practices in middle schools and discusses what can be done to improve instruction in five basic areas: (1) approaches to teaching; (2) lesson planning and implementation; (3) classroom instructional resources; (4) instructional activities and arrangements; and (5) promotion of higher order thinking. The monograph emphasizes the following groups of strategies: 1 and 2 are concerned with assessing reading and writing performance; 3 through 9 center around cooperative learning as it relates to various topics; 10 through 13 show practical ways to develop students' vocabulary with example spanning curricular areas. The remaining strategies deal with improving students' comprehension and appreciation of what they read. (NKA)

The InterActive Classroom

This highly practical guide shows how learning support teachers and assistants can work effectively with secondary school pupils who are struggling with their reading. It relates directly to the working practices of teachers, steering them through issues such as: assessing the low-age reader working with reading withdrawal groups finding and creating resources for low-age readers constructing spelling strategies to support...
reading understanding the emotional dimension to being a poor reader how to effectively involve parents. Paul Blum offers valuable advice on how to make challenging mainstream subject textbooks accessible to low-aged readers and help on where to find good free resources as well as commercial materials to suit them. Exploring the vital relationship between the mainstream and learning support function, he also outlines the ways in which the two can be harnessed to make a significant difference to reading improvement.

With the national push towards inclusion, more students with disabilities are being placed in general education settings. Furthermore, when placed, more students with disabilities are entering social studies classrooms than any other content area. Classroom teachers are being asked to “reach and teach” all students, often with little support. There are numerous texts on the teaching of social studies, an equal number on teaching students with disabilities. Blending best practice in social studies and special education instruction, this book provides both pre - and in-service educators simple, practical strategies that support the creation of engaging, relevant, and appropriate social studies opportunities for all students. Though the strategies presented are useful for all students, they are particularly beneficial for students with disabilities. From Universal Design for Learning, mnemonics, graphic organizers, and big ideas, to co-teaching, screen readers and the Virtual History Museum, this book offers hands-on, practical ideas general educators can use when teaching K-12 social studies in inclusive classrooms.

Praise for Marketing Champions "Much has been written about the importance of using marketing principles and tools effectively. But we've paid far less attention to how marketing works within an organization—and how marketers can better interact with other prime movers in their companies. This book really delivers on this much-neglected subject—sounding a wake-up call to marketers everywhere on how to exert their influence and improve their contribution to cash flow." —Philip Kotler, S.C. Johnson Distinguished Professor of International Marketing, Kellogg School of Management, Northwestern University "The authors understand that marketing is now the most important force within an organization—if you can figure out how to coordinate the rest of your colleagues. This book shows you how." —Seth Godin, author of Small Is the New Big "This leadership guide is a must-read for every executive who wants to understand the crucial connection between marketing and bottom-line results." —Warren Bennis, Distinguished Professor of Business Administration, University of Southern California, and author of On Becoming a Leader "The best marketing leaders are those who can harness the power of the enterprise—not just lead the marketing team. This book will give you the ability to align and inspire the entire company." —Jerry Noonan, Spencer Stuart

Practical Strategies for Living with Dyslexia

The present information resource is one of the outcomes of the work in Sub Project 3 (To define integrated, knowledge-based, practicable species-specific strategies to improve farm animal welfare) of the Welfare Quality research project (www.welfarequality.net). This project was co-financed by the European Commission within the 6th Framework Programme, (contract No. FOOD-CT-2004-506508), and it focussed on the integration of animal welfare in the food quality chain. It is the largest piece of integrated research work yet carried out on farm animal welfare in Europe. Forty four institutes and universities, representing thirteen European countries and four Latin American countries participated in this integrated research project. In a 'fork to farm' approach the project recognizes that consumers' perception of food quality is not only determined by its overall nature and safety but also by the welfare status of the animal from which it was produced. Thus, animal welfare is viewed as an integral part of an overall 'food quality concept'. Welfare Quality focussed on the three main species (cattle, pigs, and chickens) and consisted of a number of Sub Projects (SPs). For example, SP 1 was designed to identify, analyse and acknowledge consumer concerns and market demands while Sub Projects 2 and 3 respectively aimed to develop and validate: i) reliable on-farm welfare assessment systems and ii) practical species-specific strategies to improve farm animal welfare. The work in SP3 addressed key welfare problems that are perceived as important by European stakeholders, including producers, retailers, academics, government and the public. These problem areas were identified in a joint exercise involving biologists, social scientists and citizens and they include handling stress, harmful traits in pigs and cattle, injurious behaviours (feather pecking and cannibalism in laying hens, and tail biting in pigs), lameness in broiler chickens and dairy cattle, neonatal mortality in pigs, and social stress in pigs and cattle. Their alleviation could greatly improve the quality of life for farm animals as well as often improving productivity and product quality and thereby generating economic benefits for the farmers.

Improving Medicare Star Ratings

This practice-building resource examines the psychology behind non-adherence and the importance of building commitment to treatment as the foundation of successful therapy. Coverage starts by illustrating the complex phenomena of non-adherence at different stages of intervention—including mechanisms and situations that may prevent even initial engagement. From there, experts from diverse specialties offer interest-promoting strategies tailored to specific conditions (diabetes, anxiety, depression) and populations (children, dually diagnosed patients), informed by the current knowledge base on treatment effectiveness and recent technological advances. And the editors make patient-centered recommendations for the health and mental health professions to make therapy more accessible and open. Among the topics covered:

- Meeting patients where they are: using a stage approach to facilitate engagement.
- Use of mindfulness in promoting treatment engagement.
- DBT and treatment engagement in the context of highly suicidal complex clients.
- Behavioral Problems in children: ADHD and ODD.
- Engagement of patients in the self-management of pain.
- Engaging trauma survivors in treatment.

A breakthrough in the behavioral health delivery services literature, Practical Strategies and Tools to Promote Treatment Engagement offers real-world tools, guidelines, and expertise to health psychologists, primary care physicians and nurses, clinical psychologists, and clinical social workers. It is a vivid reminder that patients need not only what’s good for them, but also what works for them.

The Language of Negotiation

This book is about knowledge management (KM) in law firms. Knowledge has gained increased recognition in management literature as well as in management practice over the last decade as an important strategic resource and differentiating factor. The focus of the book is on the academic and practical efforts directed at identifying essential KM issues such as the form of knowledge and cultural values in law firms, as well as mechanisms that, for example, support sharing and developing knowledge in law firms.
