The Selected Lectures of Ralph Waldo Emerson

Six Centuries of English Poetry This book offers a radical new theory of the role of poetry in the rise of cultural nationalism. With equal attention to England, Scotland, and Wales, the book takes an Archipelagic approach to the study of poetics, print media, and medievalism in the rise of British Romanticism. It tells the story of how poets and antiquarian editors in the British nations rediscovered forgotten archaic poetic texts and repurposed them as the foundation of a new concept of the nation, now imagined as a primarily cultural formation. It also draws on legal and ecclesiastical history in drawing a sharp contrast between early modern and Romantic antiquarianisms. Equally a work of literary criticism and history, the book offers provocative new theorizations of nationalism and Romanticism and new readings of major British poets, including Allan Ramsay, Thomas Gray, and Samuel Taylor Coleridge.
An English Anthology of Prose and Poetry, Shewing the Main Stream of English Literature Through Six Centuries.(14th Century-19th Century) Collects poems from more than one hundred English poets, including Chaucer, Shakespeare, and Yeats, and charts the evolution of lyric poetry over the last six centuries.

Catalogue of Books Recommended for Public Libraries In recent years the canon of eighteenth-century poetry has greatly expanded to include women poets, labouring-class and provincial poets, and many previously unheard voices. Fairer's book takes up the challenge this ought to pose to our traditional understanding of the subject. This book seeks to question some of the structures, categories, and labels that have given the age its reassuring shape in literary history. In doing so Fairer offers a fresh and detailed look at a wide range of material.

Critical Approaches to Six Major English Works Poetry will no longer keep in time with action; it will be ahead of it.' Arthur Rimbaud The active and colourful lives of the poets of nineteenth-century France are reflected in the diversity and vibrancy of their works. At once sacred and profane, passionate and satirical, these remarkable and innovative poems explore the complexities of human emotion and ponder the great questions of religion and art. They form as rich a body of work as any one age and language has ever produced. This unique anthology includes generous selections from the six nineteenth-century French poets most often read in the English-speaking world today: Lamartine, Hugo, Baudelaire, Verlaine, Rimbaud, and Mallarme. Modern translations are printed
opposite the original French verse, and the edition contains over a thousand lines of poetry never previously translated into English.

The Poetic Edda: The Mythological Poems This is the first and only comprehensive selection of lectures by Ralph Waldo Emerson, his era's most prominent American man of letters and one of the foremost architects of our intellectual culture. Based on authoritative texts selected and edited by Ronald A. Bosco and Joel Myerson--the most experienced Emerson editors working today--these twenty-five addresses collectively exemplify the lecture style for which Emerson was famed in his day. Best known to his contemporaries as a lecturer, Emerson delivered some 1,500 addresses over the course of his career. Because his most important ideas were worked out in his lectures, they provide the best record we have of his evolving thought--and thus are a key to our understanding of his essays and other printed works. Gathered here are lectures on American culture, literary theory and aesthetics, moral and, as Emerson called it, "intellectual" philosophy, and social and political reform. They are taken from speaking engagements in the United States and the British Isles over the period 1833-1871, during which Emerson often spent four to six months a year on the lecture circuit; lectures from the earliest years of Emerson's career (1833-1842) have been newly edited for this volume. The volume's introduction draws on contemporary accounts to describe Emerson's idiosyncratic but utterly memorable manner of speaking. A headnote provides context to the composition and delivery of each lecture, and footnotes identify Emerson's allusions to persons, places, occasions, quotations, and books. "By examining his lectures and how they were delivered," say Bosco and Myerson, "we can look into the laboratory of Emerson's intellectual and compositional process and see his published writings gestating."

Six Centuries of English Literature: Chaucer to Spenser, with introductory essay by W.L. Renwick

An English Anthology of Prose and Poetry, Shewing the Main Stream of English Literature Through Six Centuries (14th Century-19th Century) In each of these six essays, treating the greatest literary accomplishments of medieval and renaissance England, the author is concerned with the literary work as a whole and with a survey of recent critical approaches to it. Beowulf, by R. E. Kaske; The Canterbury Tales, by Richard L. Hoffman; Le Morte Darthur, by Larry D.
Benson; The Faerie Queen, by A. C. Hamilton, King Lear, by Ernest William Talbert; and Paradise Lost, by Irene Samuel.

A History of English Rhythms "Now appeared the English romantic school, a sect of 'dissenters in poetry,' who spoke out aloud, kept themselves close together, and repelled settled minds by the audacity and novelty of their theories. They had violently broken with tradition, and leaped over all classical culture, to take their models from the Renaissance and the middle-age. They sought, in the old national ballads and ancient poetry of foreign lands, the fresh and primitive accent which had been wanting in classical literature, and whose presence seemed to them to be a sign of truth and beauty. They proposed to adapt to poetry the ordinary language of conversation, such as is spoken in the middle and lower classes, and to replace studied phrases and a lofty vocabulary by natural tones and plebeian words. In place of the classic mould, they tried stanzas, sonnets, ballads, blank verse, with the roughness and subdivisions of the primitive poets. . . . Some had culled gigantic legends, piled up dreams, ransacked the East, Greece, Arabia, the Middle Ages, and overloaded the human imagination with hues and fancies from every clime. Others had buried themselves in metaphysics and moral philosophy, had mused indefatigably on the condition of man, and spent their lives on the sublime and the monotonous. Others, making a medley of crime and heroism, had conducted, through darkness and flashes of lightning, a train of contorted and terrible figures, desperate with remorse, relieved by their grandeur. Men wanted to rest after so many efforts and so much success. On the going out of the imaginative, sentimental, and Satanic school, Tennyson appeared exquisite. All the forms and ideas which had pleased them were found in him, but purified, modulated, set in a splendid style. He completed an age."—Taine.

Six Centuries of Great Poetry Thomas Campion, Milton, Crashaw, Herbert, Bourne, Walter Savage Landor - all these poets, between them spanning the period from the Elizabethan to the Victorian age, wrote a substantial body of Latin verse in addition to their better-known English poetry, representing part of the vast and almost unexplored body of Neo-Latin literature which appealed to an international reading public throughout Europe. The Latin poetry of these English poets is of particular interest when it is set against the background of their writings in their own tongue: this collection examines the extent to which our judgment of a poet is altered by an awareness of his Latin works. In some we find prefigured themes which were later treated in their English verse; others wrote Latin poetry throughout their lives and give evidence in their Latin poetry of interests which do not find expression in their English compositions. This volume is a valuable resource for students of both Latin and English literature.
