see a return on your investment. In not favorable weather conditions where there is little to no sun, you may need an alternate source of power for your water heater, which can be a hassle. 5. Condensing Water Heater. This water heater uses your home’s unused gas fumes to heat your water…Pool heaters make your swimming pool more comfortable even when the air temperature isn’t. From heating the water after a chilly night or extending your swimming season in the spring and fall, In the Swim carries gas pool heaters, propane pool heaters, solar pool heaters and pool heat pumps to help make your pool water temperature perfect any time of day, night and year. Solar water heaters have two primary parts: a solar collector and a storage tank. The solar collector is usually an insulated box with a bunch of tubes that turns the sun’s energy into heat. When the water passes through the tubes, the tank heats and stores it. Gas tankless water heaters only heat your water when you need it, which can reduce energy costs. Paired with A. O. Smith’s 15-year tankless limited warranty, gas tankless models can be a smart, money-saving solution for your home.
