IAP Textbook of Pediatrics - Avery's Neonatology Board Review - Maternity and Women's Health Care - E-Book
Praxishandbuch der pädiatrischen Grundversorgung - Respiratory Care Anatomy and Physiology - E-Book
Avery's Diseases of the Newborn - Wilkins' Clinical Assessment in Respiratory Care - E-Book
Master the patient assessment skills you need to provide effective respiratory care! Wilkins' Clinical Assessment in Respiratory Care, 9th Edition prepares you to assist physicians in the decision-making process regarding treatment, evaluation of the treatment’s effectiveness, and determining if changes in the treatment need to be made. Chapters are updated to reflect the latest standards of practice and the newest advances in technology. From lead author Dr. Albert Heuer, a well-known educator and clinician, this market-leading text also aligns content with National Board for Respiratory Care exam matrices to help you prepare for success on the NBRC’s CRT and RRT credentialing exams. Comprehensive approach addresses all of the most important aspects and topics of assessment, so you can learn to assess patients effectively. Case studies provide real-life clinical scenarios challenging you to interpret data and make accurate patient assessments. Questions to Ask boxes identify the questions practitioners should ask patients (e.g., coughing, sputum, shortness of breath) or questions to ask themselves (e.g., lung sounds they are hearing, blood pressure, respiratory rate) when confronted with certain pathologies. Learning objectives, key terms, and chapter outlines begin each chapter and introduce the content to be mastered. Assessment questions in each chapter are aligned to the learning objectives and reflect the NBRC Exam format, with answers located on the Evolve companion website. Key Points at the end of each chapter emphasize the topics identified in the learning objectives, providing easy review. Simply Stated boxes highlight and summarize key points to help you understand important concepts. NEW! Updated content throughout the text reflects the latest evidence-based practices and clinical developments, including infection control measures, imaging techniques, assessment of critically ill patients, and the increased reliance on telehealth and electronic health records. NEW! Updated and revised content aligns with the latest NBRC credentialing exam matrix. NEW! Take-Home points are included for each chapter, plus cases as well as questions and answers for students to use in testing and applying their knowledge.
Textbook of Pediatric Emergency Procedures

As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX ®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child’s growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the "why." Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical
information of a non-emergency nature. Nursing alerts feature critical information that MUST BE considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures.

**Neonatal Nursing, An Issue of Critical Care Nursing Clinics of North America E-Book**

With collaboration from Consulting Editor, Dr. Jan Foster, Dr. Beth Diehl has created a current issue that updates the topic of neonatal nursing. Expert authors have contributed clinical reviews that address the following topics: Family Centered Care and Multidisciplinary Rounding in the NICU; Standardized Feeding Protocols and NEC; Preventing Hypoglycemia: Finding the Sweet Spot; The EMR and Big Data in Neonatology; Fetal Surgery and Delayed Cord Clamping: Neonatal Implications; Neonatal Encephalopathy: Current Management and Future Trends; Modes of Neonatal Ventilation; Neonatal Resuscitation: NRP 7th Edition Practice Integration; Neonatal Pain: Perceptions and Current Practice; Neuroprotective Developmental Care for the Preterm Infant in the first 72 Hours of Life; NAS: An Uncontrollable Epidemic; and Neonatal Transport: Current Trends and Practices. Readers will come away with the current clinical information they need to improve patient outcomes in the NICU.

**Maternal, Fetal, & Neonatal Physiology - E-Book**

Prepare for success on the neonatology boards and in clinical practice with Avery’s Neonatology Board Review: Certification and Clinical Refresher. This highly practical review tool follows the exam blueprint, is based on the trusted content found in Avery’s Diseases of the Newborn, and has been carefully tailored for effective exam review by renowned neonatologist and educator, Patricia Chess, M.D. Concise, relevant
information is presented in a way that’s easy to study and remember, giving you an important advantage on this challenging exam, as well as in the daily, fast-changing practice of neonatology. Equips residents, fellows, and physicians with an efficient, comprehensive system for study, designed specifically to help you perform at your best on the board exam. Presents information in a high-yield, outline format highlighted by key points, graphs, tables, images, and algorithms. Over 300 questions online Features board-style vignettes in every chapter with full, discursive answers online. Written by experts in the field of Neonatal-Perinatal Medicine, representing a wealth of trusted insight and guidance.

**Textbook of Neonatal Resuscitation (NRP) 7th Edition 2016**

"Fourth Edition revised to meet current ILCOR guidelines, scope of practice, educational standards, and other pertinent medical and science recommendations. Additional content on COVID-19 and new content on soft skills have been added"--

**Neonatal and Pediatric Respiratory Care - E-Book**

Designed for busy primary care specialists and other first-line care providers, Conn’s Current Therapy 2018, by Drs. Edward T. Bope and Rick D. Kellerman, delivers up-to-date treatment information in a concise yet in-depth format. Recognized leaders in the field provide their personal approaches and evidence-based clinical management options for the conditions you’re most likely to see in your everyday practice. Follows a consistent, templated format throughout, with diagnosis, therapy, drug protocols, and treatment pearls presented in easy-to-use boxes and tables for fast reference. Focuses on the most current diagnosis and treatment protocols for common complaints, acute diseases, and chronic illnesses – more than 300 topics, all
carefully reviewed and updated. Features new and significantly revised chapters on Acute Myocardial Infarction, Hypertension, Peripheral Arterial Disease, Valvular Heart Disease, Hepatitis C, Adrenocortical Insufficiency, Urethral Strictures, Obsessive Compulsive Disorder, Chronic Obstructive Pulmonary Disease, Fibromyalgia, Menopause, Travel Medicine, and much more. Provides current drug information thoroughly reviewed by PharmDs.

Neonatal and Pediatric Cerebro-Cardiopulmonary Resuscitation

This comprehensive book thoroughly addresses common clinical challenges in newborns, providing an evidence-based, step-by-step approach for their diagnosis and management. Common Problems in the Newborn Nursery is designed to be an easy-to-use, practical guide, covering a full range of clinical dilemmas: bacterial and viral infections, jaundice, hypoglycemia, hypotonia, nursery arrhythmia, developmental dysplasia of the hips, newborn feeding, cardiac problems, late preterm infants, dermatology, anemia, birth injuries, ocular issues, as well as hearing assessments in the newborn. Written by experts in their fields, each chapter begins with a clinical case presentation, followed by a discussion of potential treatment and management decisions and various differential diagnosis. Correct responses will then be explained and supported by evidence-based literature, teaching readers how to discern the normal from the abnormal, the emergent from the non-emergent, and how to make decisions concerning diagnosis encountered on a daily basis. While this guide is directed towards health care providers such as pediatricians, primary care physicians, and nurse practitioners who treat newborns in the general nursery, this book will also serve as a useful resource for anyone interested in working with this vulnerable patient population, from nursing and medical students, to nurses, and residents in pediatrics or family practice.
Ensure you’re referencing the most accurate information surrounding nursing practice in today’s neonatal intensive care unit with AWHONN’s Core Curriculum for Maternal-Newborn Nursing, 6th Edition. Developed by one of the most authoritative associations in neonatal intensive nursing care, AWHONN, this renowned guide provides in-depth coverage of the most common neonatal disorders and their management — focusing on the latest evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications. Additionally, the concise outline format makes information easy to find as it highlights the essentials of each condition including the definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes. With timely content that sets the standard for neonatal nursing practice, this trusted reference is an excellent resource for practicing nurses working in any NICU worldwide. Content developed by AWHONN, one of the most authoritative associations in neonatal intensive care nursing, ensures the information is both accurate and relevant. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Full-scope coverage of neonatal nursing practice provides information on families, ethics, legal issues, research, case management, the transition to home, and more. Focus on evidence-based practice related to preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. Strategies to promote inclusionary care better reflect today’s nursing care today with a focus on family-centered care, comprehensive perinatal records, health care teams in the NICU, and infant care best practices. NEW! Expanded information on breastfeeding and acquired opioid dependency keep you informed with the latest best practices related to these two everchanging areas. NEW! Updated neonatal resuscitation guidelines ensures you follow the most up-to-date protocols and procedures in this critical skill area. NEW! Additional tables and boxes help you quickly find important information.

Neonatal Medicine

Textbook of Neonatal Resuscitation (NRP) 7th Edition 2016The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery.New in the 7th edition!Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140] new full-color photographs replacing most line drawings
Nelson Textbook of Pediatrics E-Book

Stay up-to-date with the latest in women’s health! Maternity and Women's Health Care, 12th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. The new edition is thoroughly updated and consistent with the NCLEX® test plan, focusing on prioritization of care and how best to work among interprofessional teams. As in previous editions, this text emphasizes childbearing concerns like newborn care, wellness promotion and the management of women's health problems. The 12th edition integrates the continuum of care throughout, focusing on the importance of understanding family, culture, and community-based care along with new medication alerts, future trends in contraception, human trafficking, the zika virus, and more! Content on many high-risk conditions has been updated to reflect newly published guidelines. Expert authors of the market-leading maternity nursing textbook deliver the most accurate, up-to-date content. Clinical Reasoning Case Studies provide you with opportunities to critically analyze a client situation and utilize clinical reasoning skills to identify priorities in care." Community Activity boxes focus on maternal and new born activities that can be pursued in local community settings and online and illustrate nursing care in a variety of settings including assisting clients locating resources. Cultural Considerations stress the importance of considering the beliefs and health practices of clients and their families from various cultures when providing care. Emergency boxes provide information about various emergency situations and offer a quick reference in critical situations. Medication Guides provide key information about commonly used medications with specific nursing implications. Nursing Care Plans identify priority client problems and concerns along with appropriate interventions and rationale. Highlighted Safety alerts integrated within the content draw attention to developing competencies related to safe nursing practice. Signs of potential complications highlight vital concerns, alerting you to signs and symptoms of complications and the immediate interventions to provide. Teaching for Self-Management boxes highlight important information that you need to communicate to patients and families for follow-up care. Medication Alerts
highlighted and integrated within the content alert you to critical drug information that must be considered to provide safe client care.

**Pediatric Secrets - E-Book**

Trusted by physicians and advanced practice providers through ten standard-setting editions, Fanaroff and Martin's Neonatal-Perinatal Medicine, 11th Edition, remains the reference of choice for expert, multidisciplinary guidance on the management and evidence-based treatment of problems in the mother, fetus, and neonate. An expanded team of international authors, led by Drs. Richard J. Martin, Avroy A. Fanaroff, and Michele C. Walsh of Rainbow Babies and Children's Hospital, brings you up to date with advances in the control of nosocomial infections in preterm infants, genetic disorders and birth defects, the fetal origins of adult disease, the late preterm infants, and much more – all designed to help you improve the quality of life and long-term outcomes of your patients. Helps you make informed clinical choices for each patient – from diagnosis and treatment selection through post-treatment strategies and management of complications – with a dual focus on neonatology and perinatology. Includes a new chapter on Social and Economic Contributors to Neonatal Outcome. Features extensive updates and reorganization throughout, with new Key Points at the end of each chapter Provides up-to-date, evidence-based content, with more information on precision medicine and genetics. Uses detailed, full-color illustrations that depict disorders in the clinical setting and explain complex information. Remains the most comprehensive, multidisciplinary text in the field – an excellent source of information for every stage of your practice.

**Textbook of Neonatal Resuscitation**
Welcome to the 21st Edition of Nelson Textbook of Pediatrics – the reference of choice among pediatricians, pediatric residents, and others involved in the care of young patients. This fully revised edition continues to provide the breadth and depth of knowledge you expect from Nelson, while also keeping you up to date with new advances in the science and art of pediatric practice. Authoritative and reader-friendly, it delivers the information you need in a concise, easy-to-use format for everyday reference and study. From rapidly changing diagnostic and treatment protocols to new technologies to the wide range of biologic, psychologic, and social problems faced by children today, this comprehensive reference keeps you on the cutting edge of the very best in pediatric care. Includes more than 70 new chapters, including Postural Orthostatic Tachycardia Syndrome (POTS), Rare and Undiagnosed Diseases, Approach to Mitochondrial Disorders, Electronic Nicotine Delivery Systems, Zika, update on Ebola, Epigenetics, Autoimmune Encephalitis, Global Health, Racism, Media Violence, Strategies for Health Behavior Change, Positive Parenting, and many more. Features hundreds of new figures and tables throughout for visual clarity and quick reference. Offers new and expanded information on CRISPR gene editing; LGBT health care; gun violence; vaccinations; immune treatment with CAR-T cells; new technology in imaging and genomics; new protocols in cancer, genetics, immunology, and pulmonary medicine; and much more. Provides fresh perspectives from four new associate editors: Nathan J. Blum of The Children’s Hospital of Philadelphia; Karen Wilson of Mt. Sinai School of Medicine in New York; Samir S. Shah of Cincinnati Children’s Hospital Medical Center; and Robert C. Tasker of Boston Children’s Hospital. Remains your indispensable source for definitive, evidence-based answers on every aspect of pediatric care.

Core Curriculum for Neonatal Intensive Care Nursing E-Book

In collaboration with Consulting Editor, Dr. Bonita Stanton, Drs. Beena Sood and Dara Brodsky have assembled expert authors to bring current information to pediatricians on the topic of Current Advances in
Neonatal Care. The focus of the issue spans the full continuum of care, including articles on prenatal care, care in the delivery room, nursery, and post-discharge. Articles are specifically devoted to the following topics: Prenatal Genetic Testing Options; Current Intrauterine Surgery Options; Recent Changes in Neonatal Resuscitation (include LMA); Current Recommendations of Sepsis Evaluation in the Newborn; Hypoglycemia in the Newborn; Maternal Thyroid Disease and Impact on Newborn; Current Approach to Neonatal Abstinence Syndrome; The Current State of State Newborn Screening; Late Preterm Infant: Known risks and monitoring recommendations; Intrauterine Growth Restriction: Postnatal Monitoring and Outcomes; Hearing Risks in Preterm Infants: Who is at risk and how to monitor?; Management Options for Hemangiomas in the Neonate; GERD in the Newborn: Who needs to be treated and what approach is beneficial?; Outpatient Management of NICU Graduate; and Neurodevelopmental Outcome of Premature Infants. Readers will come away with the most current information they need to improve patient outcomes with evidentiary support.

Safety Training for Obstetric Emergencies

Prepare to think critically, take a more clinical perspective, and connect theory with practice! Written specifically for respiratory care students in an easy-to-understand format, Respiratory Care Anatomy and Physiology: Foundations for Clinical Practice, 4th Edition details applied respiratory and cardiovascular physiology and how anatomy relates to physiological functions. Content spans the areas of detailed anatomy and physiology of the pulmonary, cardiovascular, and renal systems, and covers the physiological principles underlying common therapeutic, diagnostic, and monitoring therapies and procedures. Thoroughly updated to reflect changes in the NBRC exam, this comprehensive, clinically relevant text features open-ended concept questions that help you learn how to think like the expert you aim to become. Chapter outlines, chapter objectives, key terms, and a bulleted points to remember feature highlight important concepts and make content more accessible. Open-ended concept questions require reasoned responses based on thorough comprehension.
of the text, fostering critical thinking and discussion. Clinical Focus boxes throughout the text place key subject matter in a clinical context to help you connect theory with practice by understanding how physiology guides clinical decision-making in the real world. Appendices contain helpful tables, formulas and definitions of terms and symbols. Evolve resources include a 600-question test bank in NBRC-style, PowerPoint presentations with ARS questions, an image collection, and an answer key to concept questions. UPDATED! Thoroughly updated content reflects changes in the NBRC exam. NEW and UPDATED! New images enhance understanding of key concepts.

**Textbook of Neonatal Resuscitation (NRP) 7th Edition 2016**

"ACoRN (short for Acute Care of at-Risk Newborns) was developed by an expert group of Canadian neonatal care providers and educators. Since launching in 2005, ACoRN has been taught across Canada and internationally, in formats varying from 1- to 3-day local, regional, or provincial/territorial workshops to module-based learning over a period of weeks. As with many education programs, ACoRN has evolved from didactic sessions and tabletop simulations to the hands-on, simulation-based workshops utilized today. Updates to the first edition of the text were published in 2010 and 2012 to add new content (on therapeutic hypothermia, for example)"

**Obstetric Anesthesia Practice**

Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner’s Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative
approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations — all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient’s caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW!
Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice.

Manual of Neonatal Respiratory Care

Ideal for accelerated maternity and pediatrics courses, Maternal-Child Nursing, 4th Edition is filled with user-friendly features to help you quickly master essential concepts and skills. It offers completely updated content that's easy to read and understand. Plus, active learning tools give you the chance to practice applying your knowledge and make learning fun! Critical Thinking Exercises allow you to apply your knowledge to realistic clinical situations. Nursing care plans assist you with applying the nursing process to plan individualized care for the most common maternity and pediatric conditions. Critical to Remember boxes summarize and highlight essential, need-to-know information. Communication Cues provide practical tips for effective verbal and nonverbal communication with patients and families. Clinical Reference sections in pediatric chapters present information relevant to each body system, including anatomy and physiology, differences in the pediatric patient, and related laboratory and diagnostic tests. Integrated electronic features match icons in the text, so you can use print and electronic resources more effectively together. Using Research to Improve Practice boxes help you determine proper care to reinforce best practice. Spanish translations are included for phrases commonly encountered with maternity and pediatric patients. Improved design makes the text easier to read, and up-to-date photos ensure accuracy.

Acute Care of At-Risk Newborns
"Pregnancy is a normal maternal physiological state that is developed to accommodate and nurture the fetus and enable the mother during labor. Pregnancy engenders multiple systemic changes - whether it be hormonal, mechanical, or circulatory. The gravid uterus and the increase in progesterone and estrogen levels, attributes to the multi systemic changes. The increase in peptide hormones alters connective tissue characteristics leading to structural changes to the kidneys, ureters, ribcage, diaphragm, and abdominal compartments. Cardiac output, pulmonary blood flow, and circulating blood volume are all increased in response to rising metabolic demands. There are additionally significant changes in many biochemical lab results in comparison to the non-pregnant women. Awareness of those changes will not only enable clinicians to navigate normal pregnancy but also to identify critical pathological values that assist in the further management"--

**Maternal-Child Nursing**

**Critical Care Transport**

Get the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX-RN® examination. Written by the foremost experts in maternity and pediatric nursing, the user-friendly Maternal Child Nursing Care, 6th Edition provides both instructors and students with just the right amount of maternity and pediatric content. This new edition includes updated case studies within Nursing Care Plans, as well as a new chapter on pediatric cancer. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Critical thinking case studies
offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Nursing Care Plans include rationales for interventions and provide you with an overview and specific guidelines for delivering effective nursing care. Nursing Alerts highlight critical information that you need to know when treating patients. Guidelines boxes outline nursing procedures in an easy-to-follow format. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes in the maternity unit highlight important information nurses need to communicate to patients and families. Cultural Competence boxes equip you with the knowledge you need to deliver culturally competent care. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care. Medication Guides serve as an important reference of drugs and their interactions.

**Advanced Emergency Care and Transportation of the Sick and Injured**

Neonatology is a new and quickly developing medical specialty. The rate of child and infant mortality and the incidence of adult diseases on life expectancy in any country are strongly dependent on the quality of medical aid to neonates. This is an area of medicine where a lot of new industrial innovations are used in combination with the humanizing of technologies. This book includes information on several aspects of neonatal care beginning with resuscitation in the delivery room and culminating with methods of constructing a parent-friendly atmosphere. It is addressed to neonatologists, obstetricians, pediatricians, nurses, and social workers.
A new edition of the proven guide to providing emergency care for mothers-to-be in acute medical distress. Now in its sixth edition, Critical Care Obstetrics offers an authoritative guide to what might go seriously wrong with a pregnancy and delivery and explains how to manage grave complications. Written by an international panel of experts, this updated and revised edition contains the most recent advances in the field as well as recommendations for treating common complications such as bleeding, thrombosis, trauma, acute infection, airway problems and drug reactions in a pregnant patient. This important guide offers the information needed to enable the early-on recognition of life-threatening conditions and the use of immediate life-saving treatments in emergency situations. The techniques and procedures outlined help to maximise the survival prospects of both the mother and fetus. The authors offer an accessible text for any healthcare professional responsible for the care and management of pregnant women and their unborn children. Critical Care Obstetrics is a vital resource that: Contains a clear guide for early recognition of conditions which may prove life threatening; Offers new information on Analgesia and sedation; Imaging and interventional radiology in pregnancy; Oxygen therapy; and Pulmonary hypertension; Presents protocols for implementing life-saving treatments in emergency situations. Written by international experts in emergency obstetric medicine Designed for use by obstetricians and obstetrician and gynecology trainees, Critical Care Obstetrics is the updated guide to the management of serious conditions in pregnancy and delivery.
Developed to improve patient safety during labor and delivery, the OB F.A.S.T. (Obstetrical Feasible Approach to Safety Training) simulation program is a proven, award-winning resource designed for all members of the interdisciplinary obstetrics team to use together. Written by Dr. Giancarlo Mari, who developed the program and currently trains providers around the U.S. and the world, this volume helps teams strengthen their common knowledge of obstetric emergencies. This knowledge is then applied to rehearse emergencies together and prepare team members to provide a safe labor and delivery experience for every mother and child. Features easy-to-follow images and diagrams to reinforce team knowledge of common obstetric emergencies, from cardiac arrest and anesthesia considerations to intrapartum fetal monitoring and amniotic fluid embolism. Offers suggestions for how to run a simulation drill, as well as key points for debriefing and documentation. Includes essential background information to facilitate quick reference and skills checklists to evaluate team performance. Designed for every member of the obstetric team – from those who are new to the field to practitioners with years of experience.

Conn's Current Therapy 2018 E-Book

Pediatric resuscitation medicine has witnessed significant advances with improved understanding of the pathophysiology of cardiac arrest and resuscitation. Multiple mechanisms of neurological injury have been identified, outlining potential avenues for neuroprotection following cardiac arrest. Resuscitation science exists at multiple levels of analysis, from biomechanics of chest compressions to implementation of best training procedures in real time, from epidemiology of cardiac arrest survival to molecular mechanisms of cellular injury due to ischemia and reperfusion. What next steps in research and in clinical practice will ensure the best possible neurologic outcome among children who survive cardiac arrest? How can we leverage novel technologies in neuroimaging, nanomaterials, drug delivery, biomarker-based risk stratification and next
generation sequencing, among others, to resuscitate and to protect the Central Nervous System (CNS)? How can we improve clinical trial design and data analyses to maintain a robust clinical research infrastructure and to ensure validity and applicability? These are just some of the questions will addressed in this Research Topic. Using evidence-based algorithms and public health approaches to disseminate them, the last decade has seen a paradigm shift in pediatric resuscitation with significantly improved survival from pediatric cardiac arrests. However, neurologic outcome in survivors remains far from optimal. High quality CPR is increasingly recognized as a key factor for improving neurologic outcomes. Advanced technologies allow monitoring the quality of CPR and just-in-time feedback to improve the quality of CPR. Further research is needed to evaluate impact of these technologies on neurologic outcome. The recent American Heart Association CPR guidelines emphasis on Circulation-Airway-Breathing (CAB) approach to CPR needs a careful evaluation in children, in whom timely airway and breathing support are as important as circulation. The growing controversy regarding use of epinephrine, and alternative routes of administration of epinephrine during CPR, warrants further evaluation in the setting of pediatric CPR. Improved outcome of hemodynamic goal-directed CPR over standard CPR in animal models of cardiac arrest has initiated interest in physiology-based CPR, especially in the in-hospital cardiac arrest. Basic and applied-science research have become relevant for specific subpopulations of pediatric cardiac arrest victims and circumstances (e.g., ventricular fibrillation, neonates, congenital heart disease, extracorporeal cardiopulmonary resuscitation). Just-in-time and just-in-place simulation training, which have evolved as training strategies to improve quality of CPR, are being evaluated for outcomes. The concept of just-in-time and just-in-place coaching of CPR providers on high quality CPR is a novel concept which has emerged recently and remains unstudied. Whilst there have been significant advances in newborn stabilization over the last decade many questions remain unanswered. These include the role of delayed cord clamping in preterm infants and term newborns requiring resuscitation, the role of sustained inflations as a method of respiratory support and the role of epinephrine and volume administration in neonatal resuscitation. Novel methods of assessment including the use of end tidal CO2 monitoring,
respiratory function monitoring and near infrared spectroscopy warrant further evaluation. The use of transitioning animal models that accurately replicate the newborn circulation with patent fetal shunts are emerging but more assessments in these are required to better establish CPR strategies in newborn infants. Newborn resuscitation training programs have resulted in a reduction in neonatal mortality in the developing world, but key questions remain around the frequency of training, team training methods and the role of simulation training. Post resuscitation interventions, in particular therapeutic hypothermia, has resulted in significant improvements in long-term outcome and there is now a growing interest in adjunct therapies, such as use of melatonin, erythropoietin, or other neuroprotective molecules to improve therapeutic benefits of cooling. Therapeutic hypothermia did not provide any higher benefit than normothermia in children following out of hospital cardiac arrest, although three is considerable debate in the community whether 14% probability of observing a similar outcome if the study were repeated a 100 times applies to an individual child in the PICU. Exciting research is occurring in unraveling connection between inflammation, immune dysregulation and neuroinjury. This will further support research on the use of anti-inflammatory agents and immunomodulators for neuroprotection after cardiac arrest and birth asphyxia.

**Common Problems in the Newborn Nursery**

The latest edition of this popular book covers the “how-to” of respiratory care of newborns. Chapters from the previous edition have been updated to reflect advances in both equipment and practice, while newer chapters reflect the evolving worldwide approaches to neonatal respiratory failure, such as sustained inflation, optimization of lung volume, and the use of volumetric capnography, aerosol therapy, and management of chylothorax. New additions to the book also include chapters on assessment of large data bases, implementation of quality improvement programs in neonatal respiratory care, chronic ventilation of the baby with non-respiratory failure. The text also features case studies for self-review and is illustrated with high
quality radiographic images, figures, tables, and algorithms. Written and edited by international experts, the Manual of Neonatal Respiratory Care, Fourth Edition is a thorough update and remains a convenient source of practical information on respiratory physiology, exam techniques, tips for performing procedures, radiography, ventilation, pain management, transport, and discharge planning.

**Maternal Child Nursing Care - E-Book**

**Klaus and Fanaroff's Care of the High-Risk Neonate E-Book**

For more than 30 years, the highly regarded Secrets Series® has provided students and practitioners in all
areas of health care with concise, focused, and engaging resources for quick reference and exam review. Written by Drs. Richard A. Polin and Mark F. Ditmar, Pediatric Secrets, 7th Edition, features the Secrets’ popular question-and-answer format that also includes lists, tables, pearls, memory aids, and an easy-to-read style – making inquiry, reference, and review quick, easy, and enjoyable. The proven Secrets Series® format gives you the most return for your time – succinct, easy to read, engaging, and highly effective. Fully revised and updated throughout, including protocols and guidelines that are continuously evolving and that increasingly dictate best practices. Practical, up-to-date coverage of the full range of essential topics in the practice of pediatrics. Top 100 Secrets and Key Points boxes provide a fast overview of the secrets you must know for success in practice and on exams. Features bulleted lists, mnemonics, practical tips from leaders in the field – all providing a concise overview of important board-relevant content. Portable size makes it easy to carry with you for quick reference or review anywhere, anytime.

Merenstein & Gardner's Handbook of Neonatal Intensive Care - E-Book

Welcome to the gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), and endorsed by the University of Maryland, Baltimore County (UMBC) and the International Association of Flight and Critical Care Providers (IAFCCP), Critical Care Transport, Second Edition, offers cutting-edge content relevant to any health care provider training in critical care transport. Authored by leading critical care professionals from across the country, Critical Care Transport, Second Edition, contains state-of-the-art information on ground and flight transport that aligns with the latest evidence-based medicine and practices. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, tra

Maternal, Fetal, & Neonatal Physiology - E-Book

**Wong's Essentials of Pediatric Nursing - E-Book**

Widely acclaimed for its outstanding step-by-step illustrations, comprehensive coverage, and reader-friendly format, Textbook of Pediatric Emergency Procedures is now in its thoroughly updated Second Edition. In 137 chapters, the book provides clear, complete instructions on every emergency medicine procedure performed on infants, children, and adolescents. More than 1,000 detailed drawings, most in two-color, show how to perform each procedure. This edition includes a new chapter on new technologies and techniques for managing the difficult airway. Other new topics include use of tissue adhesives in laceration repair, focused abdominal sonography for trauma (FAST), management of priapism, reimplanting an avulsed permanent tooth, use of automatic external defibrillators, and procedures related to bioterrorism.

**IAP Textbook of Pediatrics**

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-
resuscitation care and preparing for resuscitation

140+ new full-color photographs replacing most line drawings

Avery's Neonatology Board Review

Covering the evaluation and management of every key disease and condition affecting newborns, Avery’s Diseases of the Newborn, by Drs. Christine A. Gleason and Sandra E. Juul, remains your #1 source for practical, clinically relevant information in this fast-changing field. You’ll find the specific strategies you need to confidently diagnose and treat this unique patient population, in a full-color, easy-to-use single volume that focuses on key areas of practice. Now in a thoroughly revised 10th Edition, this highly respected reference is an authoritative clinical resource for neonatal practitioners. Provides up-to-date information on every aspect of newborn evaluation and management in a new, visually improved format featuring more than 500 all-new, full-color illustrations integrated within each chapter. Includes greatly expanded Neurology and Hematology sections that highlight the knowledge and expertise of new co-editor, Dr. Sandra E. Juul. Features all-new chapters on Palliative Care, Gastroesophageal Reflux, Platelet Disorders, Transfusion Therapy, Hypertension, and The Ear and Hearing Disorders, as well as expanded coverage of brain injury and neuroprotective strategies in the preterm and term infant. Contains new Key Points boxes at the beginning of every chapter. Brings you up to date on current topics such as the evolving epidemic of neonatal abstinence syndrome and the new clinical uses of ultrasound.

Maternity and Women's Health Care E-Book

Maternal-Child Nursing - E-Book
Neonatologie

Trusted by neonatologists for more than 40 years, Klaus and Fanaroff's Care of the High-Risk Neonate provides unique, authoritative coverage of technological and medical advances in this challenging field, and includes personal and practical editorial comments that are the hallmark of this renowned text. The 7th Edition helps you take advantage of recent advances in the NICU that have improved patient care, outcomes, and quality of life, with new coverage of genetics and imaging, new cases and commentary throughout, new contributors, and much more. Covers all aspects of high-risk neonatal care, including resuscitation, transport, nutrition, respiratory problems and assisted ventilation, and organ-specific care. Includes two new chapters: Genetics, Inborn Errors of Metabolism, and Newborn Screening; and Neonatal Imaging. Features new case studies, new editorial comments that provide pearls and red herrings, and question-and-answer sections at the end of each chapter. These popular features set this book apart from other NICU-related titles. Uses a new two-color format for readability and quick reference. Contains updated content throughout; easy-to-follow clinical workflow algorithms; numerous tables and illustrations; useful appendices with drug information, normal values, and conversion charts.

Praxishandbuch der pädiatrischen Grundversorgung

Respiratory Care Anatomy and Physiology - E-Book

Learn to improve the respiratory care of neonates, infants, and children. Neonatal and Pediatric Respiratory Care, 5th Edition gives you a solid foundation in the assessment and treatment of respiratory disorders. Clear,
full-color coverage simplifies the principles of respiratory care while emphasizing clinical application. A critical piece in respiratory care’s total curriculum solution, this new edition includes all the changes in current clinical practice and in the education environment. Learning objectives at the beginning of each chapter break down key content into measurable behaviors, criteria, and conditions, and self-assessment questions provide an excellent review for the NBRC Neonatal/Pediatric Specialty exam. UPDATED! Content reflects the latest developments in the field meeting the needs of AD programs and BS Respiratory Care programs which are growing in this field. NBRC exam-style assessment questions test your comprehension of the material in each chapter. Neonatal and pediatric disorders case studies provide an opportunity to see how content covered in the text applies to the more difficult areas of care for neonatal and pediatric disorders. Comprehensive test preparation is provided through coverage of all the content in the matrix for the NPS exam. Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors, criteria, and conditions. Academic and authoritative presentation of content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application. Dedicated Quality and Safety chapter addresses quality care for the neonatal/pediatric patient. NEW! Revised chapter Invasive Mechanical Ventilation of the Neonate and Pediatric Patient, conforms to the new terminology and taxonomy for modes of ventilation. NEW! Additional case studies provides more application opportunities for you. NEW! Revised content better correlates to the NBRC NPS exam.

* Avery's Diseases of the Newborn E-Book*

Praise for the Fifth Edition: “This book provides a complete look at neonatal healthcare delivery[It] includes discussions of contemporary topics of interest, such as informatics, genetics, global health, and family-centered care, which are vital to providers caring for neonates today. The case studies and evidence-based practice
dialogues provide great opportunities for further reflection. The book is useful to a wide audience in nursing, including undergraduate and graduate nursing students, practicing neonatal and pediatric nurses, and advanced practice nurses who care for neonates." Score: 92, 4 Stars--Doody's Medical Reviews The sixth edition of this acclaimed neonatal nursing text is completely updated to encompass the most current research findings and strategies for providing cost-effective and evidence-based care. It continues to address neonatal care from a physiologic and pathophysiologic perspective, with a major emphasis on nursing management at the bedside and advanced practice level. It examines each neonatal body system and describes evidence-based interventions that assist in understanding the ‘why’ behind various clinical presentations. Integrative management is threaded throughout the text along with extensive research findings to support practice strategies and rationales for sound clinical decision-making. Case studies, evidence-based practice boxes, QSEN competencies, and online resources help to amplify and reinforce content. New to the Sixth Edition: New technologies including neonatal health care simulation Trauma-Informed Care Substantial revisions to the Neonatal Resuscitation Program Updates in Continuous Quality Improvement Emphasis on neuroprotective factors Emerging global trends Genomics and its relationship to precision health prevention of diseases Maternal-Fetal Units Neonatal Abstinence Syndrome and maternal drug use Leadership and cost management of the NICU Updates on neonatal care protocols and procedures, new treatments, and new trends in family-centered integrative developmental care New palliative care protocols Video clips regarding parental caregiving Parent perspectives on care Podcasts from experts in the field Highlighted callouts for Emergency Alert, Quality and Safety Issues, and Family Concerns Key Features: Complete physiologic and embryologic foundation of each neonatal body system The relevance of various diagnostic tests Integrates quality and safety as per QSEN competencies Case studies, evidence-based practice boxes, parent handouts, and online resources Authored by internationally reputed “mother” of neonatal nursing Parent Voices provide new perspective on neonatal care
**Wilkins' Clinical Assessment in Respiratory Care - E-Book**

New 8th Edition! Innovative resource for interactive, simulation-based teaching and learning The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the 8th edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.
