09.10.2021 · Impact Factor is one of the quantitative tools for ranking, evaluating, categorizing, and comparing journals. It is a measure of the frequency with which the "average article" in a journal has been cited in a particular year or period. The annual impact factor is a ratio between citations and recent citable items published. Thus, the impact factor of a journal is calculated by ...

IDEAS/RePEc Simple Impact Factors for Journals. Explanations; Ranking; More; What this page is about This list provides a simple impact factor, computing a ratio of the number of citations by the number of items in the series. Citation counts are adjusted to exclude citations from the same series. These computations are experimental and based on the citation analysis provided by the ...

Impact factor - Wikipedia

10.03.2020 · The British Medical Journal had an Impact Factor of 27.604 in 2018, ranking it 4th among general medical journals, and is one of 55 medical and science journals published by BMJ the company. It publishes articles, news, letters, investigative journalism and commentary on the factors that help doctors to make better clinical, research and public health decisions.

The world's top medical journals - Health Writer Hub

Journals may also attempt to limit the number of "citable items"—i.e., the denominator of the impact factor equation—either by declining to publish articles that are unlikely to be cited (such as case reports in medical journals) or by altering articles (e.g., by not allowing an abstract or bibliography in hopes that Journal Citation Reports will not deem it a "citable item").
