This is the first comprehensive look at America's national park system, an insider's tour covering the system and the National Park Service, the agency responsible for its care. Dwight F. Rettie, former chief of the NPS policy development office, is uniquely qualified to address the state—the problems and the possibilities—of the system, which is comprised of millions of acres of land in more than 350 areas around the nation, including historic sites, battlefields, and recreation areas. Rettie agrees, as many critics have claimed, that the system is in disarray; he proposes in detail stronger management operations, clearer and more stringent measures of personnel performance, and training of park rangers to help them become professionals knowledgeable about the scientific management and protection of resources. For a concerned public as well as for policy-makers and students of government, this comprehensive analysis and outline may provide hope—and a future—for the invaluable legacy that is our national park system.

Ein Elefant für Inspector Chopra

In The Caper of the Crown Jewels, Jack is summoned to solve a matter of grave national importance: the theft of the Crown Jewels of the British Empire from the Tower of London. Arriving on the scene, he is greeted by a traditional Tower guard- a Yeoman Warder (or Beefeater)- who explains what's missing: The Imperial State Crown, the Sovereign's Orb, and the Sovereign's Scepter with the cross containing the finest-cut diamond in the world, the Star of Africa. Jack identifies Ivan the Incredible and his assistant, Jazz, as the thieves immediately— but puzzling out how they did it is trickier. The famous Tower has the most advanced security in the world, and even using his impressive gadgets (the Encryption notebook, Heli-Spacer, Rock Corer, and Rope Tornado) Jack is flummoxed by how the jewels were spirited out. However, Jack can conjure up more than gadgets—he foils the evil magicians with some powerful mojo of his own, dispels an invisibility enchantment, and narrowly avoids the executioner’s block before restoring the jewels to the crown and earning the gratitude of the Queen herself!

Jewels in the Crown, winner of the 2013 Montagu Trophy by the Guild of Motoring Writers, provides an analysis of Tata's acquisition of Jaguar and Land Rover in 2008, and subsequent transformation of their fortunes, written by an award-winning motoring writer. Ray Hutton goes behind the scenes to examine how Tata have not only returned the business to profit, but also transformed the public image of these long-established British brands. At the time of the takeover, both brands (once the crown jewels of the British motor industry) had been tarnished by a patchy reputation for quality and reliability. Tata bought a new approach to the business, with fast decision-making and a solid, sustainable, long-term strategy. Factory efficiency was improved and a major export drive accompanied by a succession of carefully-positioned new models, from the Jaguar XJ Saloon and P-Type sports car to the Evoque and the new, lighter but more luxurious Range Rover flagship. The result was a remarkable change of fortunes. This book shows how it was done.

Excerpt: The Queen’s Jewels (or the King’s Jewels, when the monarch is male) are a historic collection of jewels owned personally by the monarch of the Commonwealth realms; currently Queen Elizabeth II. The jewels are separate from, but not entirely unlinked to, the British Crown Jewels. The origin of a royal jewel collection distinct from the official crown jewels is vague, though it is thought that the jewels have their origin somewhere in the sixteenth century. Many of the pieces are from far away lands which were brought back to the United Kingdom as a result of civil war, coups and revolutions. Due to the size and weight of most of the official crowns, many of the tiaras and diadems are worn instead of crowns at official engagements. Many British monarchs have chosen to wear tiaras, diadems and circlets whilst
